DETAILED ACTION

1. This office action is in response to Applicant's amendment filed on 12/14/2004. Claims 1-9 have been amended. Claims 1-9 are pending.

Allowable Subject Matter

2. Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to improve the prior art Common Data Security Architecture with the modification of adding a generic trust policy library at an add-in security modules layer and a policy interpreter at a common security services manager layer. The cited prior art, "Common Data Security Architecture Specification" (CDSA), teaches all the limitations cited in claim 1 including trusted policy modules implement policies by authorities and institutions. CDSA does not explicitly disclose an add-in generic trust policy library within the add-in security modules layer and supporting a set of standard trust policy Application Programming Interfaces (APIs) and a trust policy description file containing a set of domain-specific trust policies written in a policy description language common to the architecture and a policy interpreter operable to interpret a set of policies contained in the policy description file as recited in claim 1. The art of record, either singularly or in combination, fails to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
